

# Banco de Dados

## Fundamentos

André Santanchè e Luiz Celso Gomes Jr  
Instituto de Computação - UNICAMP  
Agosto 2014

# Motivação

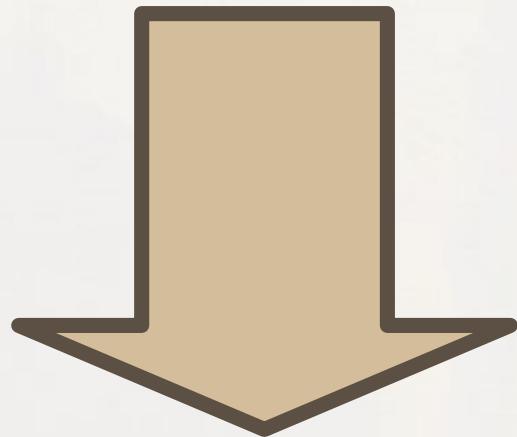

- Aplicações computacionais de todos os portes trabalham com grandes volumes de dados
  - Gerenciamento de uma farmácia
  - Sistema bibliotecário
  - Sistema bancário

# Motivação

- Grandes volumes de dados e suas relações complexas justificam a criação de estratégias específicas para gerenciá-los

# Motivação

- Grandes volumes de dados e suas relações complexas justificam a criação de estratégias específicas para gerenciá-los

Bancos de Dados

# Aplicações Tradicionais

- Bancos de dados numéricos e tradicionais
- Exemplos:
  - Gerenciamento de uma farmácia
  - Sistema bibliotecário
  - Sistema bancário

# Aplicações

- Aplicações mais recentes

- Bancos de Dados Multimídia
- Sistemas de Informação Geográfica (GIS)
- Data Warehouses
- etc.

# Banco de Dados

## Aplicação Exemplo

- Gerenciamento de uma biblioteca
- Serviços:
  - Cadastro de membros associados
  - Registro do acervo (ex.: livros, revistas etc.)
  - Controle de empréstimos

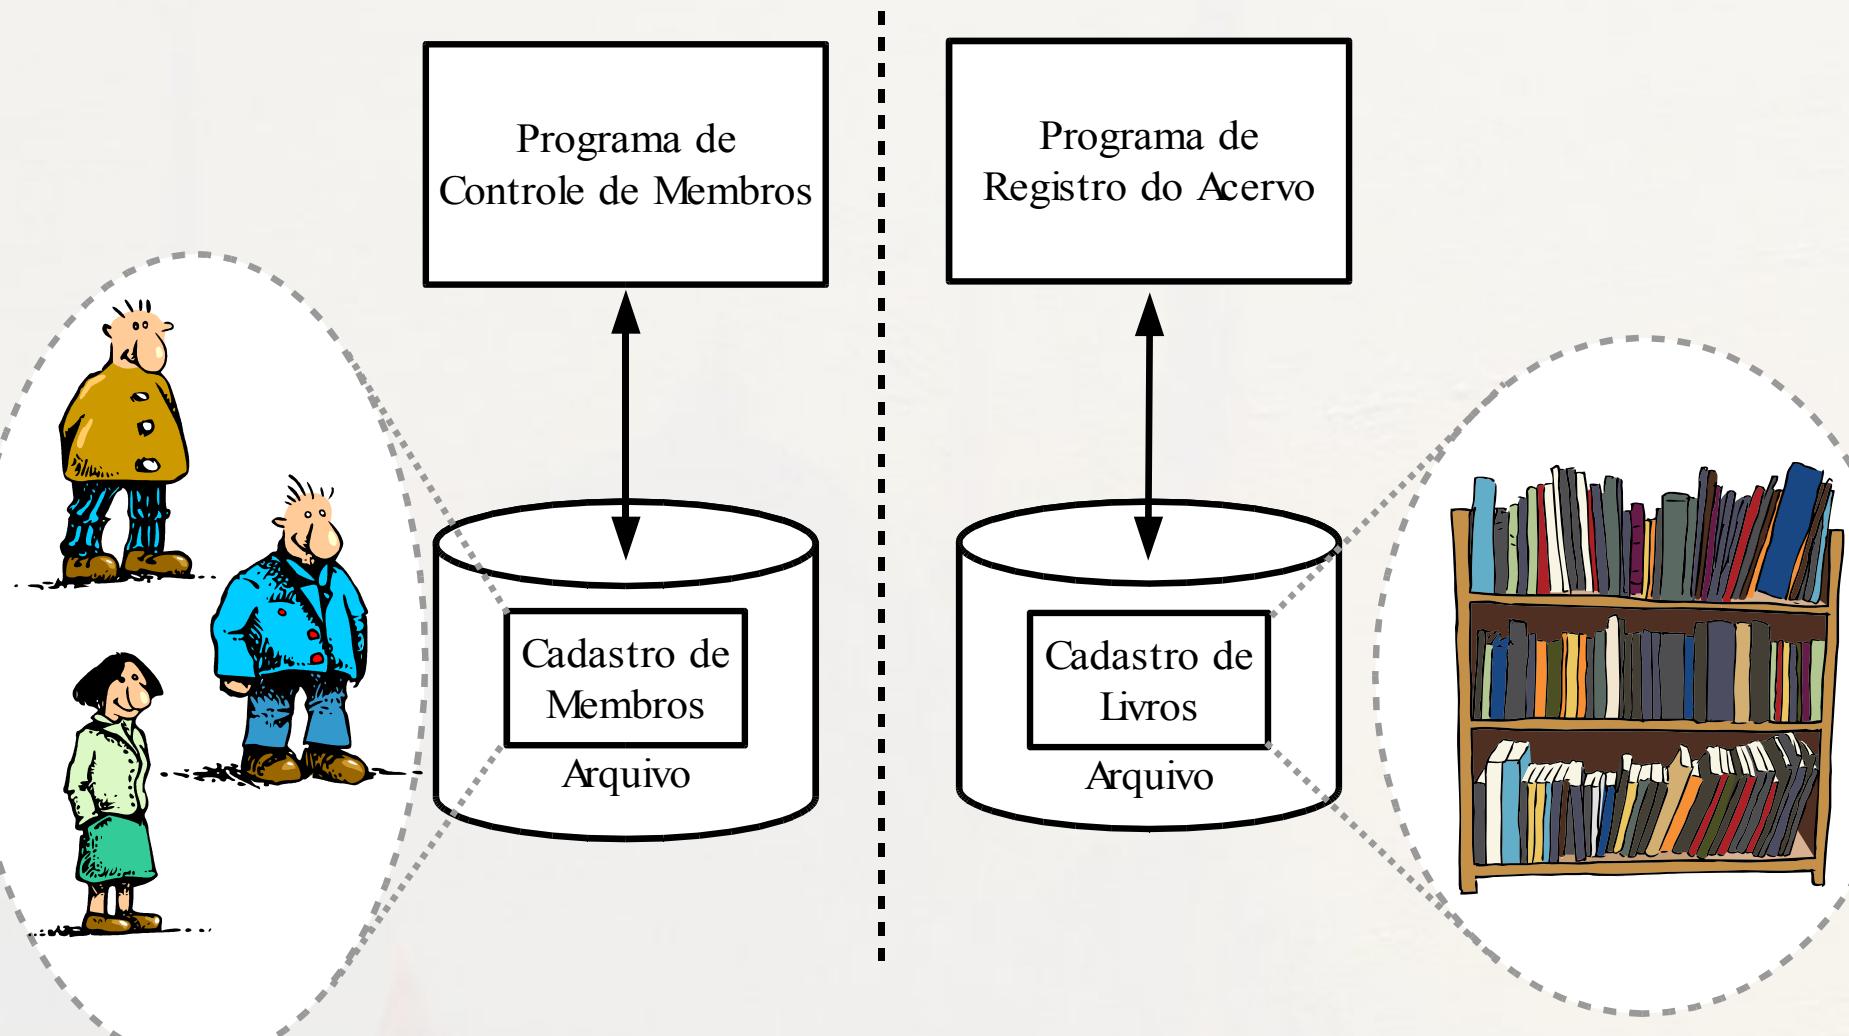

# Banco de Dados

## Perspectivas

- Arquitetura
- Abstração

# Banco de Dados Arquitetura

# Sistemas Isolados

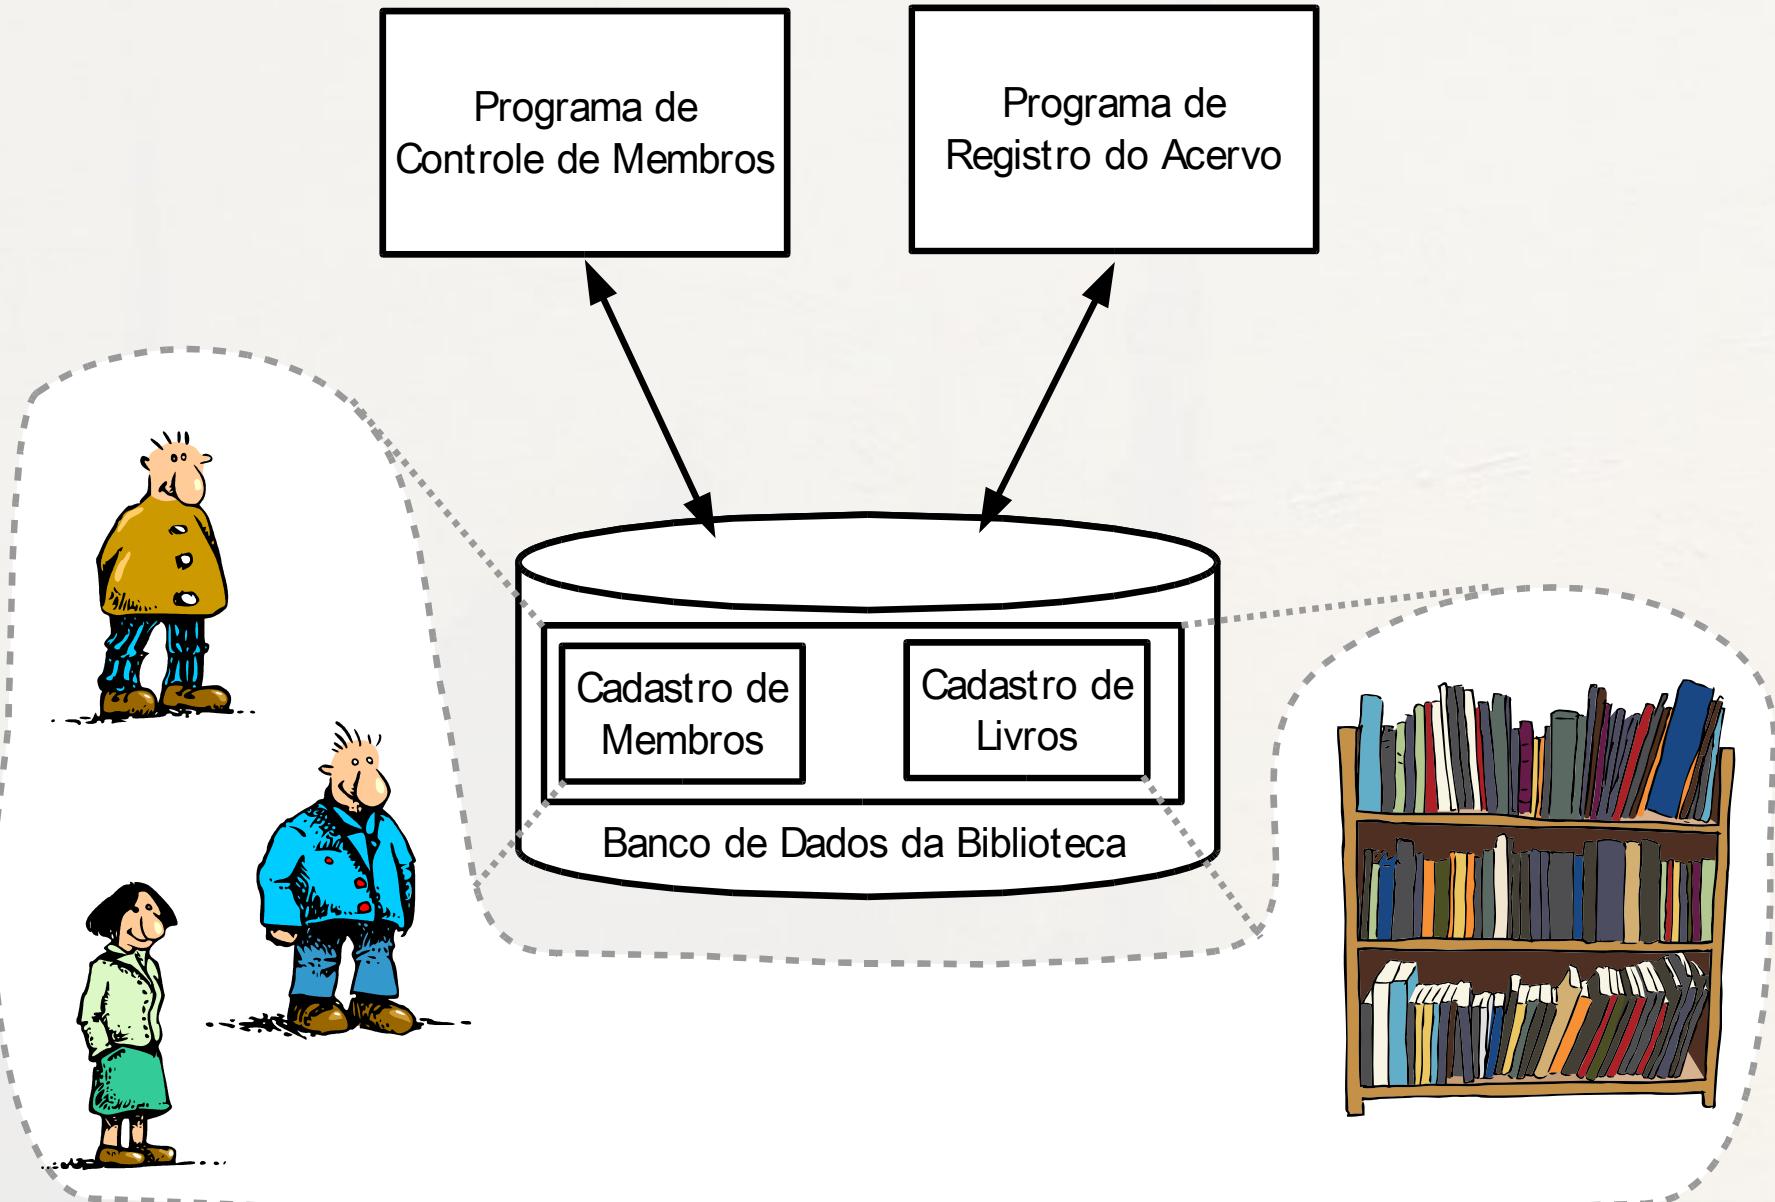

# Sistemas/Arquivos Isolados

- Redundância não controlada
  - Repetição
  - Inconsistência
- Barreiras para relacionamento entre arquivos
- Dificuldades com:
  - acesso concorrente
  - integridade e recuperação em caso de crash
  - segurança e controle de acesso

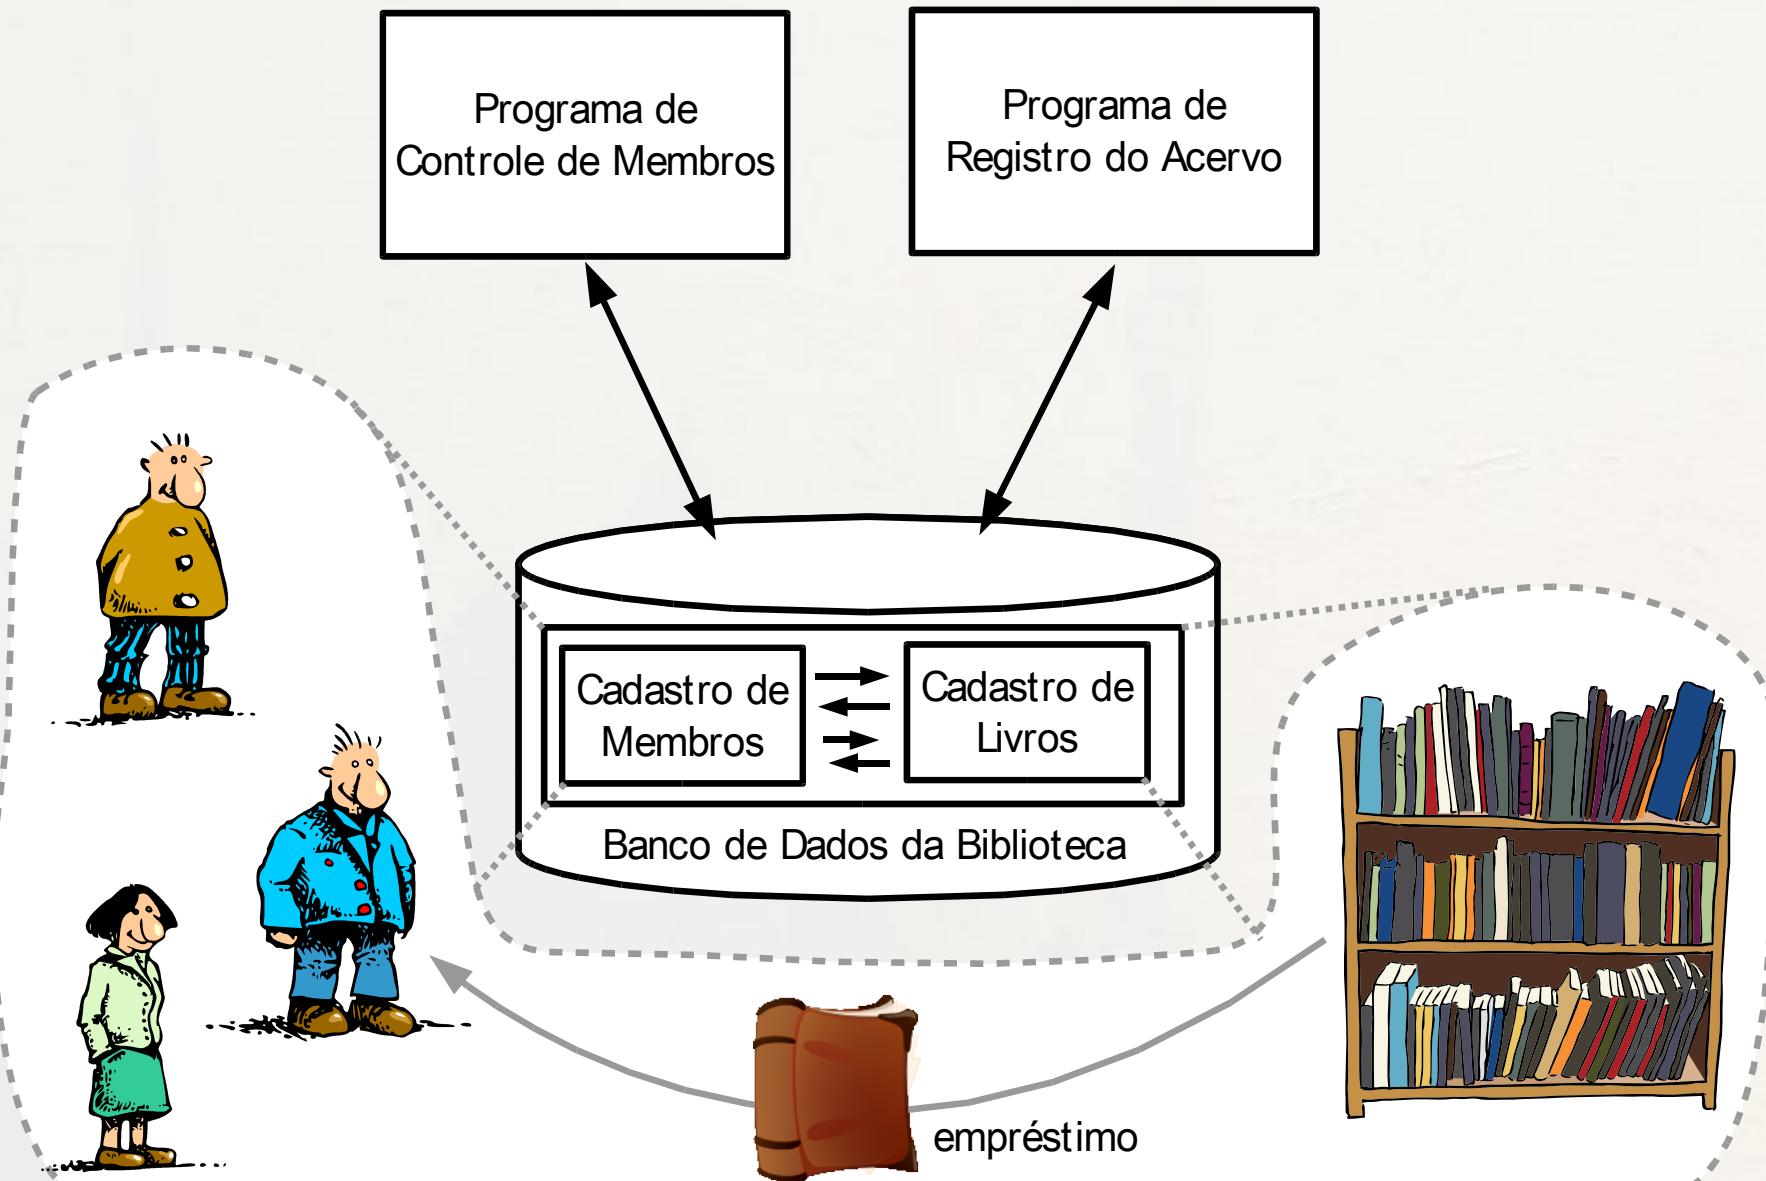

# Banco de Dados

## Compartilhamento de Dados

# Banco de Dados

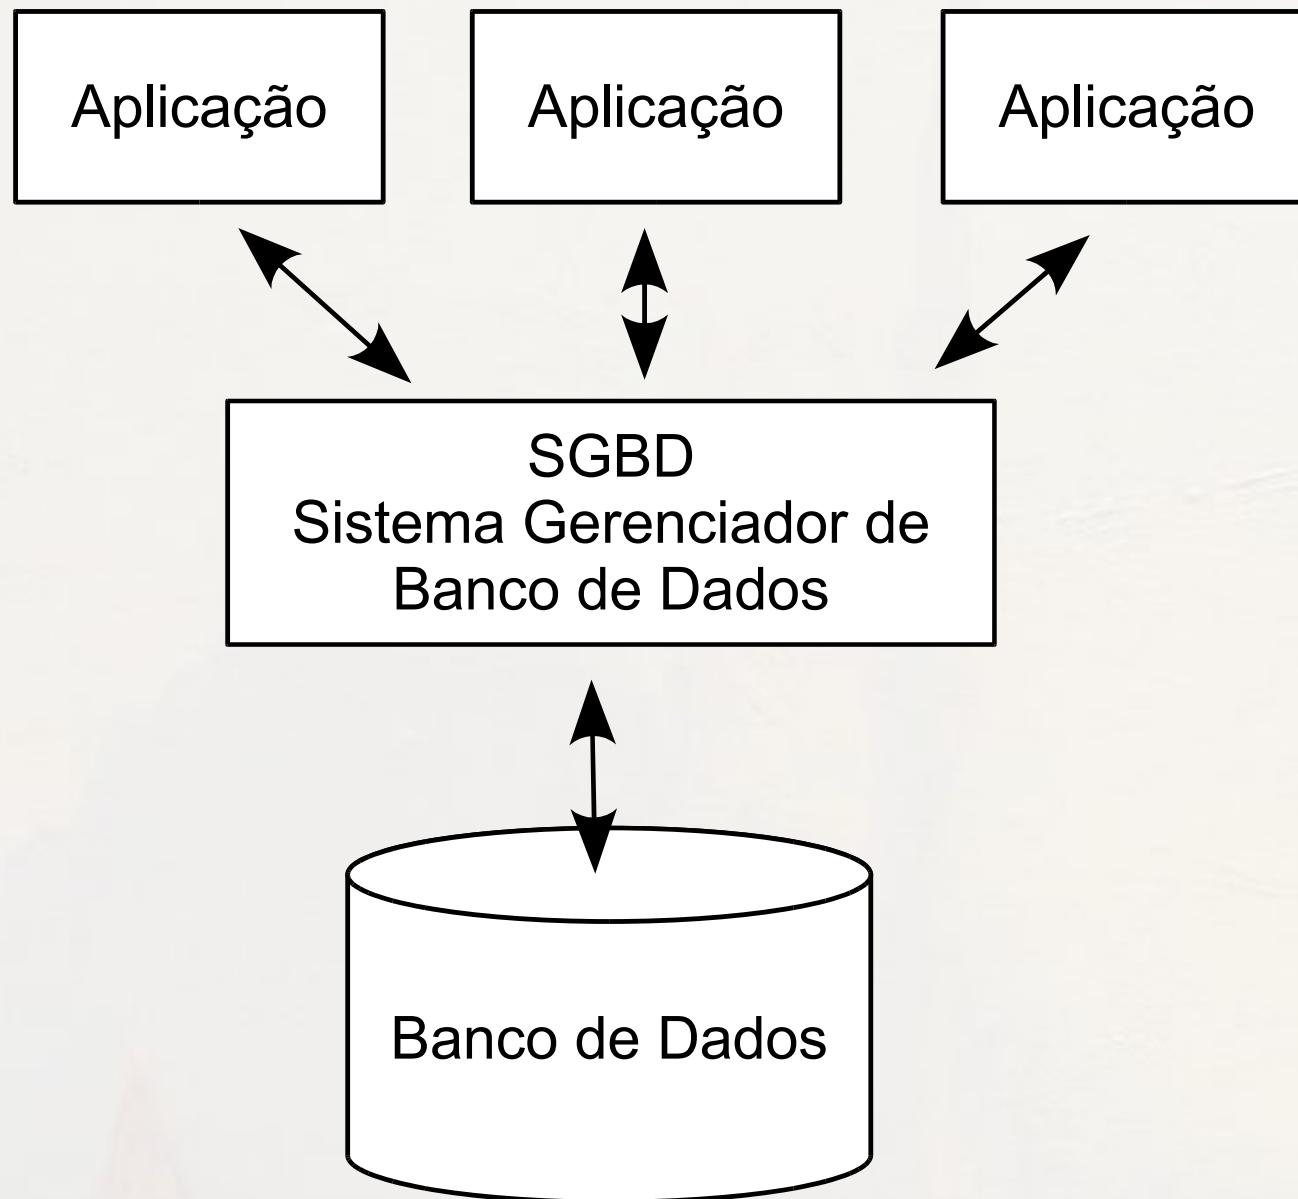

## Relações entre os Dados

# Sistema Gerenciador de Banco de Dados (SGBD)

- Sistema de software com finalidade genérica
- Projetado para a definição, construção e manipulação de bancos de dados
- Pode atender várias aplicações

# SGBD

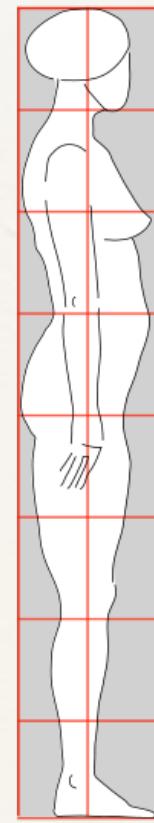

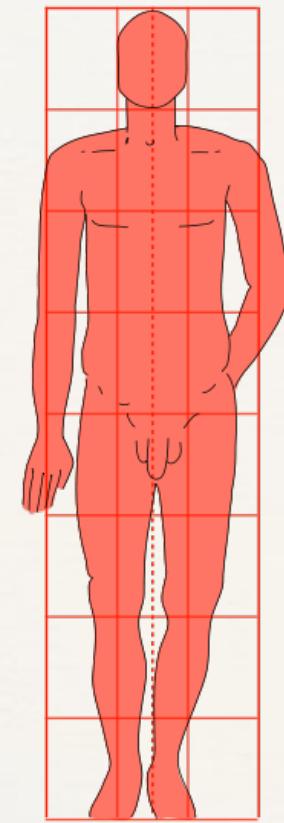

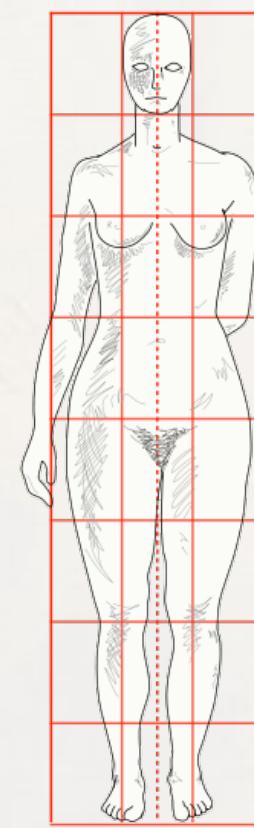

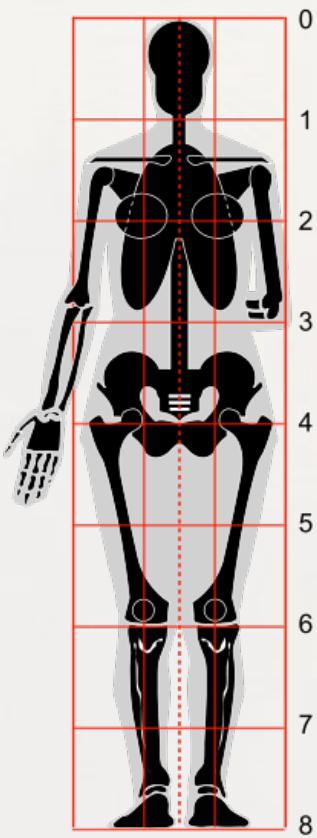

# Vantagens de um SGBD

- Independência de dados
- Acesso eficiente
- Tempo reduzido no desenvolvimento de aplicações
- Segurança e integridade de dados
- Administração de dados uniforme
- Acesso concorrente
- Recuperação contra *crashes*

(Ramakrishnan, 2003b)

Redmond, 2009

# Fourth Paradigm

- Thousand years ago:
  - science was empirical; describing natural phenomena
- Last few hundred years:
  - theoretical branch; using models, generalizations
- Last few decades:
  - a computational branch; simulating complex phenomena
- Today: data exploration (eScience)
  - unify theory, experiment, and simulation

(Jim Gray, 2007)

## Paris

From Wikipedia, the free encyclopedia

This article is about the capital of France. For other uses, see [Paris \(disambiguation\)](#).

**Paris** (English /pærɪs/, /pɛrɪs/; French: [paʁi] (listen)) is the capital and most populous city of France. It is situated on the River Seine, in the north of the country, at the heart of the Île-de-France region. Within its administrative limits (the 20 arrondissements), the city had 2,234,105 inhabitants in 2009 while its metropolitan area is one of the largest population centres in Europe with more than 12 million inhabitants.

**Country** France  
**Region** Île-de-France  
**Department** Paris  
**Subdivisions** 20 arrondissements  
**Government**

- **Mayor (2008–14)** Bertrand Delanoë (PS)

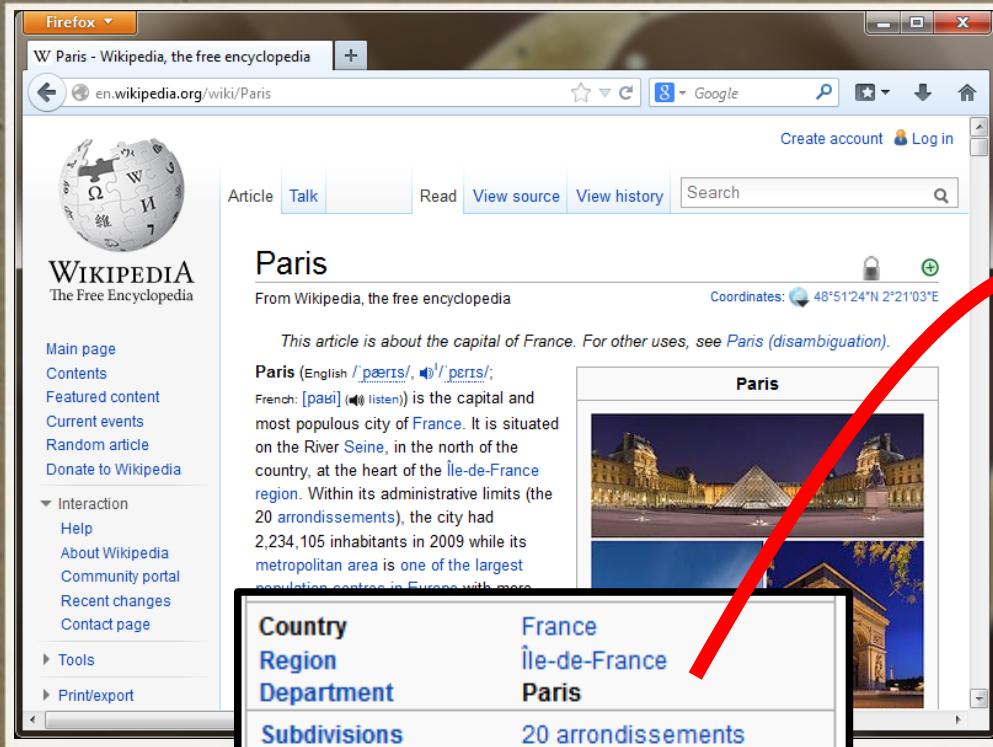

**Area<sup>[1]</sup>**

- **Urban (2010)** 2,844.8 km<sup>2</sup>  
(1,098.4 sq mi)
- **Metro (2010)** 17,174.4 km<sup>2</sup>  
(6,631.1 sq mi)
- **Land<sup>1</sup>** 105.4 km<sup>2</sup> (40.7 sq mi)

**Population (2010)<sup>[5]</sup>**

- **Rank** 1st in France

Coordinates: 48°51'24"N 2°21'03"E

SAP and Germany Make a Big Data Team at the World Cup

July 8, 2014 By Ben Hammonds

Sporttechie

<http://www.sporttechie.com/2014/07/08/sap-and-germany-make-smart-big-data-choices-at-world-cup/>

# Alemanha e Big Data

- SAP is using Big Data to help the German coaching staff **make smart decisions** on tactics, player fitness, scouting, preparation as well as in game management. SAP has introduced a new concept called **SAP Match Insights** that assists players and coaches to prepare themselves for upcoming matches by dissecting key situations that may present themselves throughout the course of the match.
